September 15, 2022

## Change of Utility Truck Body Style Code

Effective September 15<sup>th</sup>, the ATLAS body style code of Utility Truck was changed to SUV (sport utility vehicle). This is because most vehicles given this code are more accurately described as SUVs.

Vehicles that previously would have been given the body style code of Utility Truck, but are NOT SUVs, will now be given a new more correct and generic code of Utility.

### Examples

The body style **SUV** is used for a sport utility vehicle.

The body style **Utility** is used for a utility truck.
